IT / Security & Compliance / DevSecOps | 4 Years Enterprise Delivery | CISSP + PMP + ITILv5

PROFILE

• 4 years of IT delivery: 2 years as enterprise IT lead at a Tier 1 automotive supplier (APAC, multiple regions and business units) + 1 year of Microsoft Premium technical support (L2/L3) at a global software company
• Hands-on security & compliance: ISO 27001 IT audit participation, org-wide MFA rollout, CI/CD automation, no major security incidents
• Full-cycle project delivery: Independently designed, developed, tested, and shipped 20+ production projects spanning security, identity management, privacy compliance, cloud security, data governance, SRE practices, and LLM applications
• Tech stack: Python / FastAPI / SQL / Docker / K8s / Tekton / CI-CD / AWS / Azure / GCP / Intune / Entra ID / Zscaler / OIDC / SAML / WebAuthn / LLM applications
• Languages: CET-6 + IELTS 6.0; delivered full-English technical support to APAC customers across 4 countries

PROFESSIONAL EXPERIENCE

2024.02 - 2026.10 Knorr-Bremse Vehicle Equipment (Suzhou) Co., Ltd. IT Analyst, APAC IT

> Scope: APAC · 2 business units (Railway + Commercial Vehicle) · multiple regions

1. Security & Compliance Governance
• Participant in ISO 27001:2022 IT audits — control mapping, evidence collection, and audit coordination across the group audit cycle
• Owner of information security policy: org-wide MFA rollout, endpoint compliance, access governance, vulnerability remediation, security awareness training
• Owner of IT risk identification and mitigation, plus incident / problem / change management processes (ITILv5 + ServiceNow)
2. DevSecOps & Automation
• Designed and delivered an enterprise CI/CD pipeline (Python + GitHub Actions + OIDC federated identity, zero plaintext secrets)
• Canary release (staged rollout), mandatory code review, dry-run pre-validation gates
• Result: policy deployment time substantially reduced, with dual-channel rollback (git revert + platform-side undo)
• Solution adopted by other business units in the group
3. Cloud Security & Zero Trust
• Owner of multi-cloud asset compliance baseline (AWS / Azure / GCP), implementing CIS Benchmark rulesets
• Owner of Zscaler ZIA / ZPA zero-trust deployment (multiple regions)
• Drove Entra ID Conditional Access policy (risk-adaptive sign-in + device compliance gating + geo-restrictions)
4. Identity & Access Management (IAM)
• Owner of Microsoft Entra ID + Active Directory org-wide: user lifecycle, RBAC, Privileged Identity Management (PIM)
• Quarterly access reviews across privileged accounts; same-day offboarding deprovisioning
5. Incident Response & On-Call
• 24/7 on-call rotation (APAC hours); led the September 2025 certificate-expiry incident response (Intune devices failing to authenticate in bulk)
• Root cause analysis via Intune diagnostic logs + Kusto queries, tracing the root cause to a CRL endpoint that had not been added to the firewall allowlist after an Azure AD migration

Highlights:
• Zero P0 security incidents (2024–2026)
• Two consecutive ISO 27001 audits with zero findings
• Intune MDM compliance policy coverage for managed endpoints and org-wide MFA rollout
• 90% CI/CD efficiency gain with zero errors over 12 months
• SharePoint Online migration (participated)

2023.02 - 2024.02 Shanghai Wicresoft Co., Ltd. IT Technical Support Engineer, Microsoft Intune Premium

> Scope: APAC · Premium L2/L3 Support

1. Owner of enterprise Intune MDM deployment and troubleshooting for customer workflows — environment simulation, reproduction, and remote support
2. Owner of Microsoft three-cloud support (Azure public cloud / Office 365 / Dynamics 365, including Azure OpenAI and Azure AD)

3. Owner of the security vulnerability remediation workflow — OS policy hardening, encryption status verification, compliance policy auditing
4. Owner of Edge policy deployment (cloud-based and on-premises Group Policy)
5. Owner of Python security-log analysis scripts and PowerShell security policy deployment scripts
6. Delivered full-English technical support to APAC enterprise customers via calls, remote meetings, and email
7. Authored the Microsoft SME topic *"Intune Security Policy Best Practices"* — 5/5 customer satisfaction rating

PROJECTS (31 end-to-end, all public on GitHub)

Security, Risk & Compliance (14 projects)

Enterprise Risk Register & Quantification — `06-enterprise-risk-register`
Beta-PERT 10,000-iteration Monte Carlo simulation · $155M total Annual Loss Expectancy · 15 business system profiles · 5-tab analytics dashboard
PIPL Cross-Border Data Transfer Compliance — `09-pipl-cross-border`
China PIPL + GDPR 4-pathway decision engine (CAC security assessment / professional certification / SCC / exemption) · DPIA 5-dimension scoring with separate-consent mandatory veto · SCC contract template generation · SHA-256 evidence tamper-proofing
Enterprise DLP & Data Classification — `10-enterprise-dlp`
4-tier data classification (PUBLIC / INTERNAL / CONFIDENTIAL / RESTRICTED) · 9 sensitive-data detectors (Luhn, ISO 7064, Shannon entropy, cloud-credential regex) · 62 automated tests
ISO 27001 Gap Assessment Engine — `03-iso27001-gap-assessment`
18 controls × 4 domains assessment framework · evidence tracking · automated retesting · 43 tests
SOC 2 Type II Continuous Compliance — `04-soc2-continuous-compliance`
Trust Services Criteria control testing · exception management · evidence retention
PCI-DSS v4.0 Scope Reduction — `05-pci-dss-scope-reduction`
CDE boundary identification · segmentation policy modelling · SAQ eligibility assessment
Incident Response Playbooks — `01-incident-response-playbooks`
6 incident scenarios · NIST SP 800-61 Rev.2 response workflow · stakeholder communication templates
SIEM / EDR Detection Engineering — `02-siem-edr-detection`
Sigma rule library · MITRE ATT&CK technique mapping · simulated attack sample corpus
Third-Party Risk Management — `07-tprm-vendor-assessment`
Tier 1/2/3 vendor tiering · CAIQ v4 questionnaire · DPA clause scanning · data-flow mapping
B2B Client RFP Knowledge Base — `08-b2b-rfp-kb`
100+ security knowledge entries · pure-Python BM25 + TF-IDF dual retrieval engine · citation traceability · 40 tests
Vulnerability Lifecycle & SLA Management — `11-vuln-management-sla`
Trivy / Nessus parsers · composite CVSS + EPSS + KEV risk scoring · SLA state machine (ON_TRACK / AT_RISK / BREACHED)
Cloud IAM / PAM Governance — `12-cloud-iam-pam`
4 risk detection rules (wildcard admin / privilege escalation / missing MFA / dormant account) · JIT break-glass dual approval · quarterly UAR reconciliation
Multi-Cloud CSPM — `13-multicloud-cspm`
CIS Benchmark rulesets across AWS / Azure / GCP · weighted risk scoring · 21 tests
BCP / DR Tabletop Exercise — `14-bcp-dr-tabletop`
Business impact analysis (BIA) · RTO/RPO tiering · 4-phase ransomware scenario injection · corrective action tracking

Vulnerability & Security Automation (new)

Vulnerability Management Platform — CVSS × EPSS × KEV × Asset Context
`awuawuheiyohei/15-vulnerability-management-platform`
- Composite scoring that does not rely on CVSS alone: adds EPSS (probability of exploitation), CISA KEV (actively exploited in the wild), asset criticality and internet exposure
- Fully auditable: every score stores its 5 weighted components, expandable via API and dashboard
- Remediation SLAs derived from CVSS bands plus KEV / EPSS acceleration factors, with overdue flagging
- Trivy JSON, Nessus CSV and generic JSON parsers · 14 endpoints · 76 tests + 33 smoke · CI on 3.11/3.12/3.13

SOAR Automation & Response Platform
`awuawuheiyohei/16-soar-automation`
- Alert de-duplication and correlation · playbook orchestration · human approval gate on high-risk actions
- Idempotency enforced by a database unique constraint rather than application-level checks
- Compensating-action rollback · step-by-step audit trail
- 23 endpoints · 206 tests · 72 smoke · CI on 3.11/3.12/3.13

Privacy Engineering & Data Subject Rights

DSAR Management Platform (GDPR Art. 12-22)

`awuawuheiyohei/17-dsar-management`
• End-to-end lifecycle for 7 data subject rights · identity verification gate blocks any retrieval or export of personal data until verified (Art. 12(6))
• Denials require a statutory ground · per-jurisdiction deadlines (EU / UK / CA / CN)
• Statutory provisions strictly separated from industry practice (GDPR has no explicit clock-stop clause)
• 29 endpoints · 490 tests · 74 smoke · CI on 3.11/3.12/3.13

DevOps / SRE / Identity & Access

IdM SRE Lab (30-week roadmap, v1.3.0) — `idm-sre-lab`
Apple IdMS-style identity management platform with a complete SRE practice layer
• Protocol stack: OAuth2/OIDC (PKCE S256 + refresh-token rotation + RFC 7662 introspection) · SAML 2.0 · WebAuthn
• Observability: hand-rolled Prometheus exposition · 4 Golden Signals · structured logging + alert-rule engine
• Reliability: SLI/SLO with error budget · Chaos Engineering (3 experiment classes) · Incident Response (10 runbooks) · blameless Post-Mortem
• Compliance: ISO 27001 / PCI-DSS control mapping · STRIDE threat model
• Scale: 73 API endpoints · 202 automated tests · 34 end-to-end smoke checks, all passing
V-Model + Tekton CI/CD Lab — `vmodel-pipeline`
Local k3d + Tekton + Argo CD · bidirectional V-model traceability · 5-stage PipelineRun fully green · LLM-assisted CI failure analysis (v_explainer)
Intune Autopilot China-Network Resiliency Fixer — `intune-autopilot-cn-fixer`
Zero-touch deployment automation · exponential-backoff retry · error aggregation · visibility dashboard, designed for mainland-China network constraints
Intune Policy Automation — `intune-policy-automation`
GitHub Actions + OIDC authentication · blue-green deployment · audit logging

AI / LLM Applications (5 projects)

Mother & Baby AI Assistant — `mother_care`
End-to-end RAG (FastAPI + FAISS + BGE Chinese embeddings + DeepSeek-V3) · medical answer guardrails with high-risk keyword short-circuit to emergency guidance · three-gate KB curation workflow · multi-channel IM integration (DingTalk Stream / WeCom)
Retrieval-First Knowledge Base — `ai_knowledge_cockpit`
SQLite + BM25 retrieval path with LLM deliberately excluded from the hot path · 1:1 KB↔PDF audit tooling · 494-question MCQ bank · multi-channel IM support
Career Coach — `career-coach`
4-hour daily learning cap enforced by design · study-plan generation · mock-question generation · progress tracking
Meeting-to-Action — `meeting-to-action`
Local-only audio processing with immediate purge (privacy-first) · structured four-part output: summary, action items, decisions, follow-ups
RSS Reader + AI Summary — `rss-reader`
Self-hosted RSS aggregation with LLM summarisation · keyword-first with LLM fallback degradation · 5-subcommand CLI + web UI

Chinese Sentiment Analysis Platform — Baseline vs. LoRA Fine-tuning
`awuawuheiyohei/18-sentiment-analysis-platform`
• Real public dataset (11,987 food-delivery reviews; 7,987 negative / 4,000 positive) with stratified splitting and conflicting-label removal to prevent leakage
• Interpretable baseline (character n-grams + sentiment lexicon features + logistic regression): test macro-F1 0.895, trained in 19 seconds on CPU only
• LoRA fine-tuning of a general-purpose Chinese BERT with only 0.289% trainable parameters; 285 seconds and 0.95 GB peak RSS measured on Apple MPS
• Honest negative result: an off-the-shelf domain-specific model reaches macro-F1 0.969 zero-shot, beating the custom LoRA fine-tune (0.898) — fine-tuning a general base model on 12k narrow-domain samples cannot recover the prior learned during pretraining. This established the working rule "always establish a zero-shot baseline before deciding to fine-tune."
• 238 tests + 41 smoke · CI on 3.11/3.12/3.13

Other

Invoice Intelligence MVP — `invoice-intelligence-mvp`
OCR fallback with confidence scoring · multi-format export
Property Data Visualisation Platform — `dashboard5.0-main`
8-view dashboard with automatic profiling tags and alerting
Algorithm Visualisation — `LJ/algorithms`
Binary search / quicksort / graphs / dynamic programming with real-world case studies

TECHNICAL SKILLS

Category	Skills
Backend	Python · FastAPI · SQLAlchemy · RESTful API design
Frontend	Vanilla JS · HTML5 / CSS3 · single-page analytics dashboards
Database	SQLite (WAL mode) · PostgreSQL fundamentals
DevOps	Docker · Kubernetes / K3s · Tekton · Argo CD · GitHub Actions · CI/CD pipeline design
Cloud	AWS · Azure · GCP · Intune MDM · Entra ID · Zscaler
Identity Protocols	OAuth2 / OIDC · SAML 2.0 · WebAuthn / FIDO2 · PKCE · RBAC / PAM
Security	ISO 27001 · SOC 2 · PCI-DSS · CIS Benchmark · CVSS · STRIDE · GDPR · PIPL
AI / LLM	RAG (FAISS + embeddings) · prompt engineering · LLM application integration · guardrails and redaction
ITSM	ITIL v5 · ServiceNow · incident / problem / change management · on-call operations

EDUCATION

- Jiangsu University of Technology (2018 – 2022) BSc Computer Science and Technology · top 5% of cohort
- Troy University (2019 – 2021) BSc Computer Science and Technology (dual degree)
- Class representative (Years 1 and 3) · academic merit scholarships (3 semesters) · international scholarship (2 years)

CERTIFICATIONS

Certification	Detail
CISSP	Certified Information Systems Security Professional
PMP	Project Management Professional
ITIL v5 Foundation	IT Service Management
Microsoft Azure	Azure Administrator Associate
CET-6 / IELTS 6.0	English proficiency

GITHUB

https://github.com/awuawuheiyohei
31 end-to-end projects, all open source · 200+ API endpoints · 800+ automated tests · each project includes README, architecture notes, and an interactive dashboard
